

T8xxH series High junction temperature TRIACS

GENERAL DESCRIPTION :

High current density due to single mesatechnology; Glass Passivation; Guaranteed maximum junction temperature 150°C.
 T8xxH series triacs are suitable for general purpose AC switching. They can be used as an ON/OFF function in applications such as static relays, heating regulation, motor starting circuits...or for phase control operation light dimmers, motor speed controllers.
 T8xxH series are 3 Quadrants triacs. They are specially recommended for use on inductive loads.
